

Docket: 50-285

MAR 27 1985

Omaha Public Power District
ATTN: R. L. Andrews, Division Manager-
Nuclear Production
1623 Harney Street
Omaha, Nebraska 68102

Gentlemen:

This is in response to your letters of February 2 and March 1, 1985, requesting that a waiver of the mid-cycle steam generator tube inspection be allowed and providing information on the upgraded secondary water chemistry and control program at the Fort Calhoun Station.

This letter provides you our review of the information which concludes that a waiver of the mid-cycle tube inspection requirement is warranted, provided the items included in the attached evaluation conclusion and the other items included in our June 22, 1984, letter to you are implemented.

This letter confirms your additional commitments made in you February 2 and March 1, 1985, letters regarding the steam generator tube inspections at the Fort Calhoun Station. These matters will be reviewed further during subsequent inspections.

Thank you for your cooperation regarding this matter.

Sincerely,

Original Signed By:

Richard P. Denise
