

ENCLOSURE 1

NOTICE OF VIOLATION

TU Electric
Comanche Peak Steam Electric Station

Dockets: 50-445
50-446
Licenses: NPF-87
NPF-89

During an NRC inspection conducted on November 26, 1995, through January 6, 1996, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," (60 FR 34381; June 30, 1995), the violation is listed below:

- A. CPSES Technical Specification 6.11.1 states that procedures for personnel radiation protection shall be prepared consistent with the requirements of 10 CFR Part 20 and shall be approved, maintained, and adhered to for all operations involving personnel radiation exposure.

Procedure RPI-602, "Radiological Surveillance and Posting," Section 6.1.2, states that nonroutine surveys be performed as required to ensure adequate knowledge of radiological conditions prior to, during, and/or after any evolution involving exposure or potential exposure to radiological hazards.

Radiation Work Permit 95000500, "Waste Processing," Item 4, issued on June 6, 1995, states that "RP [Radiation Protection] technicians providing coverage shall perform and document necessary surveys in accordance with Procedure RPI-602."

Contrary to the above, on December 11, 1995, the licensee found that radiation protection technicians failed to perform necessary surveys to ensure adequate knowledge of radiological conditions of Spent Resin Sluice Filter 01 prior to and during filter removal and consequently replaced the filter without using a shielded transfer assembly as required by the radiological conditions and procedures.

This is a Severity Level IV Violation (Supplement IV) (445/9529-01; 446/9529-01).

Pursuant to the provisions of 10 CFR 2.201, TU Electric is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved.

Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if it is necessary to include such information, it should clearly indicate the specific information that should not be placed in the PDR, and provide the legal basis to support the request for withholding the information from the public.

Dated at Arlington, Texas,
this *8th* day of *February* 1996
