

March 25, 1985

Docket No. 50-285

Mr. R. L. Andrews
Division Manager, Nuclear Production
Omaha Public Power District
1623 Harney Street
Omaha, Nebraska 68102

Dear Mr. Andrews:

By letter dated May 16, 1984, we issued Amendment No. 78 to Facility Operating License No. DPR-40 for the Fort Calhoun Station, Unit No. 1. The amendment consisted of changes to Technical Specifications in response to your application dated November 18, 1983.

As you know, we did not evaluate your proposed technical specifications to make them consistent with the licensee event report system rule, 10 CFR 50.73, which became effective on January 1, 1984. It was our understanding that you would update that part of your application, and our review was put "on hold" until this occurred. Since that time, your updated submittal was discussed with your staff on numerous occasions and commitments were made regarding the submittal.

We have not received the updated submittal as of the date of this letter. As such, we request that you submit in writing, within thirty days of your receipt of this letter, your schedule for submitting the updated technical specifications.

The reporting and or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Please contact the NRC Project Manager, E. G. Tourigny (301-492-7110), if you have any questions concerning this letter.

Sincerely,

James R. Miller, Chief
Operating Reactors Branch No. 3
Division of Licensing
