SUBJ: Task Analysis for SNUPPS DCRDR

✓ Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Docket Nos.: 50-482, 50-483

Reference: SLNRC 84-121, 10/10/84: Same Subject

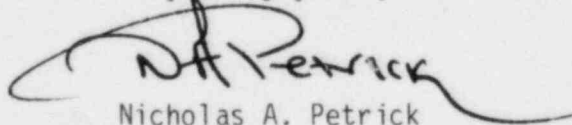

Dear Mr. Denton:

The reference letter transmitted the procedure, dated October 1984, to be used in performing the task analysis and verification for the SNUPPS Detailed Control Room Design Review (DCRDR). Results of this review are applicable to both Callaway and Wolf Creek SNUPPS units.

The procedure has been revised to allow for the use of a computer to aid in sorting information and control characteristics and to revise the basic formula used for the first attempt at determining instrument precision. The revised procedure is transmitted herewith for your information. Revision bars are provided.

A closing report is scheduled for submittal to the NRC by May 1, 1985.

Very truly yours,

Nicholas A. Petrick
