Mr. D. R. Gipson Senior Vice President Nuclear Generation The Detroit Edison Company 6400 North Dixie Highway Newport, MI 48166

SUBJECT: INTEGRATED INSPECTION REPORT NO. 50-341/95014

Dear Mr. Gipson:

This refers to the integrated inspection conducted by Messrs. A. Vegel, C. O'Keefe, and others of this office from November 21, 1995 through January 9, 1996. The inspection included a review of activities authorized for your Fermi 2 facility. At the conclusion of the overall inspection effort, the findings from each inspection were discussed with those members of your staff identified in the enclosed report at an integrated inspection exit.

Areas examined during the inspection are identified in the report. Within these areas, the inspections consisted of a selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress. The purpose of the inspection effort was to determine whether activities authorized by the license were conducted safely and in accordance with NRC requirements.

You should note that this inspection report represents an integrated product of a number of diverse inspections that were conducted during the inspection period. The summary contained in the report provides an overview of our assessment of your performance in the four functional areas (Operations, Maintenance, Engineering, and Plant Support) in which inspections were performed.

During this inspection period, we noted that your reactor water chemistry program remains strong. We also noted the recurrence of some procedure compliance and operator performance problems.

No violations of NRC requirements were identified during the course of this inspection.
