DEC 06 1984

The Detroit Edison Company
 ATTN: Wayne H. Jens
 Vice President
 Nuclear Operations
 6400 North Dixie Highway
 Newport, MI 48166

Gentlemen:

The Nuclear Regulatory Commission has completed its SALP Assessment relating to the performance of your reactor facility and will present its findings at a meeting on December 19, 1984, at 8:00 a.m. at your Nuclear Operations Center, Room 352. Arrangements for this meeting were previously made between you and Paul Byron of Region III on December 2, 1984.

We encourage Detroit Edison Company to have appropriate corporate and plant management representation at the meeting to ensure a mutual understanding of the issues and findings being presented by NRC.

While this meeting is considered a presentation and discussion forum between Detroit Edison and the NRC, the meeting will be opened to any other interested parties as observers. Those persons outside the licensee and NRC staffs should inform the Regional Office, in advance of the meeting, of their intent to participate so possible space limitations can be accommodated.

We hope this meeting will benefit your organization and provide you with a meaningful characterization of the overall safety performance for the Fermi 2 plant.

Sincerely,

"Original Signed by C. E. Norelius"
 C. E. Norelius, Director
 Division of Reactor Projects
