

ENCLOSURE 1

NOTICE OF VIOLATION

Entergy Operations, Inc.
Grand Gulf

Docket: 50-416
License: NPF-29

During an NRC inspection conducted on December 3, 1995 to January 13, 1996, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions" (60 FR 34381; June 30, 1995), the violation is listed below:

Technical Specification 5.4.1.a states, in part, that written procedures shall be established, implemented, and maintained covering the applicable procedures recommended in Regulatory Guide 1.33, Revision 2, Appendix A, February 1978. Section 8 of Regulatory Guide 1.33 states, in part, that specific procedures for surveillance tests should be written.

Contrary to the above, Procedure 06-IC-1E61-Q-1004, "Containment and Drywell Hydrogen Analyzer Calibration," was established and implemented to provide a written instruction for surveillance testing of the hydrogen analyzers, and this procedure contained deficient instructions, from November 1992 until December 1995, for testing the analyzers. Specifically, the procedure directed that reagent gas flow be adjusted to the previous test value prior to obtaining as-found calibration data.

This is a Severity Level IV Violation (Supplement I) (416/9521-02)

Pursuant to the provisions of 10 CFR 2.201, Entergy Operations, Inc. is hereby required to submit a written statement or explanation to the U. S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D. C. 20555, with a copy to the Regional Administrator, Region IV, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room, to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the Public Document Room without redaction. However, if it is necessary to include such information, it should clearly indicate the specific information that should not be placed

in the Public Document Room, and provide the legal basis to support the request for withholding the information from the public.

Dated at Arlington, Texas
