Reference: (1) Docket No. 50-285
(2) Letter NRC (D. R. Hunter) to OPPD (R. L. Andrews)
dated January 25, 1985

Dear Mr. Hunter:

Emergency Preparedness

The Omaha Public Power District received Reference (2) which concerned an offsite emergency preparedness Class A deficiency for the State of Iowa identified by FEMA during the emergency exercise of October 24, 1984. The District subsequently contacted Mr. J. B. Baird of your office regarding this matter. This letter serves to formalize the discussion held. Specifically, it was stated that based on NRC review of the FEMA Class A deficiency, the item was not classified as a significant deficiency. We therefore understand that there is no 120-day requirement to resolve this deficiency. The District is currently working with the State of Iowa toward timely resolution of this matter. To date, two training sessions have been held with the State of Iowa and a drill is scheduled for April 8, 1985.

Sincerely,

A handwritten signature in cursive script, appearing to read "R. L. Andrews".
