Re: Transfer of NRC Source Permit No. 24-20011-02
from Kaiser Aluminum & Chemical Corporation
to National Refractories & Minerals Corporation

Dear Mr. Mallett:

On December 17, 1984 we notified you of the planned sale of the Refractories Division of Kaiser Aluminum & Chemical Corporation to National Refractories & Minerals Corporation. The closing took place December 31, 1984.

This transaction has now become a two part transaction. National Refractories became the operator of the Mexico, Missouri facility on December 31, 1984. National Refractories expects to become the owner of the facility in approximately 90 days.

With the exception of the above, the letter of December 17, 1984 continues to accurately present the situation.

Very truly yours,

Charles Conard Smith
President
