Gentlemen:

SUBJECT: REPORT NO. 50-395/85-07

On February 11-15, 1985, NRC conducted a special Regional training assessment team inspection of activities authorized by NRC Operating License No. NPF-12 for your V. C. Summer facility. At the conclusion of the assessment, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the assessment are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified.

Although certain weaknesses were evident in some areas of training, the results of this assessment indicate that the administration of your plant training program is adequate to support continued licensed activity. It is our understanding that commitments concerning the correction of these weaknesses were made by your staff as detailed in the report. If your understanding of these commitments differs from that described in the report, please contact us for clarification.

Should you have any questions concerning this letter, please contact us.

Sincerely,

(Original signed by DMVerrelli)
