Duke Power Company
ATTN: Mr. H. B. Tucker, Vice President
Nuclear Production Department
422 South Church Street
Charlotte, NC 28242

Gentlemen:

SUBJECT: REPORT NO. 50-370/85-07

On February 7 - 11 and February 24 - 28, 1985, NRC inspected activities authorized by NRC License No. NPF-17 for your McGuire facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection revealed no violations of NRC requirements. However, certain activities having safety significance appeared to deviate from a commitment to the NRC. The deviations and elements to be included in your response are presented in the enclosed Notice of Deviation.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ISI

Virgil L. Brownlee, Chief
Reactor Projects Branch 2
Division of Reactor Projects
