

ENCLOSURE 1

NOTICE OF VIOLATION

Wolf Creek Nuclear Operating Corporation  
Wolf Creek Generating Station

Docket: 50-482  
License: NPF-42

During an NRC inspection conducted on December 31, 1995, through February 10, 1996, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," (60 FR 34381; June 30, 1995), the violation is listed below:

Technical Specification 6.11 states, in part, that procedures for personal radiation protection shall be prepared consistent with the requirements of 10 CFR Part 20, and shall be approved, maintained, and adhered to for all operations involving personnel radiation exposure.

Procedure AP 25A-001, "Radiation Protection Manual," Revision 2, required personnel not to deviate from the conditions of a Radiation Work Permit once it is issued.

Radiation Work Permit 950047, Revision 2, required the radiographer to comply with Procedure AP 25B-200, "Radiography Guidelines," Revision 0.

Procedure AP 25B-200 required the radiographer to ensure that the exposure area was unoccupied.

Contrary to the above, on December 21, 1995, the radiographer failed to ensure that the exposure area was unoccupied, and as a result, two technicians remained inside the posted radiography boundary while the source was exposed.

This is a Severity Level IV violation (Supplement IV) (482/9602-02).

Pursuant to the provisions of 10 CFR 2.201, Wolf Creek Nuclear Operating Corporation is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice. This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. Your response may reference or include previous docketed correspondence, if the correspondence adequately addresses the required response. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Because the response will be placed in the NRC Public Document Room (PDR), to the extent possible, it should not include any personal privacy, proprietary, or safeguards information so that it can be placed in the PDR without redaction. However, if it is necessary to include such information, it should clearly indicate the specific information that should not be placed in the PDR, and provide the legal basis to support the request for withholding the information from the public.

Dated at Arlington, Texas
