Docket No. 50-461

10CFR73.55

Document Control Desk  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: Vehicle Control Measures for Protection Against  
Malevolent Use of Vehicles at Clinton Power Station

Dear Sir or Madam:

By Illinois Power (IP) letters U-602414 dated February 16, 1995, and U-602460 dated June 13, 1995, IP provided a summary description of the proposed vehicle control measures required by 10CFR73.55(c)(7) to be implemented for the Clinton Power Station (CPS). This summary was required to be submitted in accordance with 10CFR73.55(c)(9)(i). Since the aforementioned letters were submitted, the CPS vehicle barrier system has been installed.

This letter provides notification of the differences in the CPS vehicle barrier system which was installed versus that system described in letters U-602414 and U-602460. Please note that the differences are minor in detail and do not constitute a major change in the proposed CPS vehicle barrier system as previously submitted and subsequently reviewed. Attachment 1 to this letter provides a summary of the subject differences.

All calculations and other supporting documentation used to determine that the changes in the CPS vehicle barrier system as installed versus those previously proposed meet the performance objectives of controlling vehicle access and ensuring that no unauthorized vehicle is able to penetrate the safe standoff distance, will be maintained on site and available for inspection upon request.
