Florida Power and Light Company
P.O. Box 1400
Juno Beach, Florida 33408

Dear Mr. Uhrig;

From May 23-27, 1983, NRC Safeguards Division staff conducted a Regulatory Effectiveness Review at the Turkey Point Nuclear Power Plant Units 3 & 4. The findings of that review are documented in the enclosed Regulatory Effectiveness Review and Vital Area Definition reports. In order to avoid further delay, the Regulatory Effectiveness Review report is being transmitted without its Attachment 2, which will be sent to you at a later date. Although a number of notable strengths were observed in the safeguards program, certain safeguards concerns were found that warrant further consideration. Accordingly, it is requested that you provide comments relative to the areas of concern described in Section 2.2 of the Regulatory Effectiveness Review report and to the additional vital areas identified in Section V and Appendix A of the Vital Area Definition reports within days of receipt of this letter.

Sincerely,
