Dallas, Texas 75224

Subj: Texas Utilities Electric Company, et al.
(Comanche Peak Steam Electric Station,
Units 1 & 2); Docket Nos. 50-445 and 50-446

Dear Mrs. Ellis:

Pursuant to my letter to you of December 3, 1984, I am enclosing copies of the NRC audits of the Gibbs & Hill Applied Mechanics Group referenced on page 24 of the affidavit supporting Applicants' motion for summary disposition regarding quality assurance for design. Section II of the first audit (80-01; March 28, 1980) concerns Applied Mechanics' activities. That audit was not completed at the NRC's first visit. Accordingly, I have also enclosed the NRC letter documenting completion of that audit (February 20, 1981). No adverse findings were made as a result of either review of these activities.

The second audit (81-04; January 6, 1982) included a review for several purposes (see Inspection Scope) of numerous documents employed by the Applied Mechanics Group (see items 63-80 in "Documents Examined"). No adverse findings were made with respect to the activities related to those documents. In addition, I have enclosed for your records documentation reflecting the close-out of the findings on other topics made in that audit.

Further, I am enclosing three pages from the text of Gibbs & Hill Specification MS-46A which list various regulations, codes and standards governing quality assurance activities performed under that specification. This portion of MS-46A also references Specification 2323-GS-903 (Appendix 4 to MS-46A), which I transmitted to you in my December 3 letter. Although you already have a copy of MS-46A, I have enclosed these pages to assure they are brought to your attention.

With these documents Applicants have supplied all materials supplementing our responses to CASE's informal discovery requests regarding Applicants' design QA motion, as requested by the Board (Tr. 19,469).

Sincerely,

William A. Horin
