DEC 12 1984

Docket No. 50-341

The Detroit Edison Company  
ATTN: Wayne H. Jens  
Vice President  
Nuclear Operations  
6400 North Dixie Highway  
Newport, MI 48166

Gentlemen:

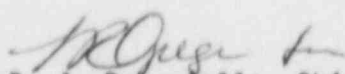

We have received the attached Federal Emergency Management Agency (FEMA) letter dated November 28, 1984, and associated evaluation of the Alert and Notification System for the Enrico Fermi Atomic Power Plant, Unit 2, in Monroe, Michigan.

The evaluation states that based on the engineering design review and the results of the demonstration of the system conducted on July 20, 1984, FEMA has determined that the Alert and Notification System installed around the Enrico Fermi Atomic Power Plant meets the guidance of NUREG-0654/FEMA-REP-1, Revision 1, and FEMA-43. The evaluation further states that there is reasonable assurance that the system is adequate to promptly alert and notify the public in the event of an accident at the site.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the attachments will be placed in the NRC's Public Document Room.

If you have any questions concerning this letter, please contact Mr. J. Patterson of my staff at (312) 790-5536.

Sincerely,

  
C. J. Paperiello, Chief  
Emergency Preparedness and  
Radiological Protection Branch

Mr. William J. Dircks  
Executive Director for Operations  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Dircks:

The Federal Emergency Management Agency (FEMA) has completed an analysis of the prompt alert and notification system for the Enrico Fermi Atomic Power Plant, Unit 2, in Frenchtown Township, Michigan. This review has been completed pursuant to FEMA rule 44 CFR 350; selected evaluative criteria and Appendix 3 in NUREG-0654/FEMA-REP-1, Rev. 1; and FEMA-43, the "Standard Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants." The enclosed report entitled "Enrico Fermi Atomic Power Plant, Unit 2 Site-Specific Offsite Radiological Emergency Preparedness Alert and Notification System Independent Technical Review," summarizes the engineering design review, incorporates the results of the telephone survey of the public conducted immediately following the alert and notification system activation on July 20, 1984, and includes the results of the review of the other applicable evaluative criteria from NUREG-0654/FEMA-REP-1, Rev. 1, and FEMA-43.

Based on the aforementioned review and the results of the alert and notification system activation, FEMA has determined that the prompt alert and notification system installed around the Enrico Fermi Atomic Power Plant, Unit 2, meets the specific design requirements of NUREG-0654/FEMA-REP-1, Rev. 1, and FEMA-43, and that there is reasonable assurance that the system is adequate to promptly alert and notify the public in the event of an accident at the site. A complete review of the plans and preparedness for the Enrico Fermi Atomic Power Plant, Unit 2, under FEMA rule 44 CFR 350, will be completed at a later date.

Sincerely,

Samuel W. Speck  
Associate Director  
State and Local Programs  
and Support
