

December 12, 1984

Docket No. 50-142

Dr. Walter F. Wegst, Director  
Office of Environmental Health and Safety  
Center for Health Sciences  
University of California, Los Angeles  
Los Angeles, California 90024

Dear Dr. Wegst:

The Nuclear Regulatory Commission has issued Amendment No. 13 to Facility Operating License No. R-71, which authorizes possession but not operation of the nuclear reactor located at the University of California, Los Angeles. This amendment is in response to your June 22, 1984 and July 26, 1984 letters requesting conversion of your license to a "possession only" status pending decommissioning and license termination. It also reflects the technical specification changes and fuel inventory reduction requested in your letter of July 25, 1984 that will provide relief from certain reactor calibration, maintenance, and reporting requirements no longer applicable with the change of the license to the "possession only" status.

Copies of Amendment No. 13 and the related Safety Evaluation Report are enclosed.

Sincerely,

Original signed by  
Cecil O. Thomas, Chief  
Standardization & Special  
Projects Branch  
Division of Licensing
