Docket Nos.: 50-445 and 50-446

> Mr. M. D. Spence President Texas Utilities Generating Company 400 N. Olive Street Lock Box 81 Dallas, Texas 75201

Dear Mr. Spence:

Transmittal of the FEMA Supplemental Interim Findings Re Offsite Subject: Emergency Preparedness for Comanche Peak Steam Electric Station (Units 1 and 2)

Enclosed are (1) a memo from FEMA providing the supplemental interim findings on offsite emergency preparedness response plans for Comanche Peak noted in Appendix 3 of SER Supplement No. 6, and (2) input concerning the staff's position on the supplemental findings which we propose to incorporate in the next Comanche Peak SER supplement. If there are any questions, please contact John Stefano of my staff at 301-492-7037.

Sincerely,

B. J. Youngblood, Chief Licensing Branch No. 1 Division of Licensing

## Federal Emergency Management Agency

Washington, D.C. 20472

NOV 2 9 1984

MEMORANDUM FOR: Edward L. Jordan, Director

Division of Emergency Preparedness

and Engineering Response

Office ut Inspection and Enforcement U.S. Nuclear Regulatory Commission

FROM:

Assistant Associate Director

Office of Natural and Technological

Hazards Programs

SUBJECT:

Supplemental Interim Finding on Commanche Peak Steam Electric Station Offsite Radiological Emergency Plans and Preparedness

Attached is a supplemental evaluation of the State of Texas and Hood and Sommervell Counties offsite radiological emergency preparedness plans sitespecific to the Commanche Peak Steam Electric Station. This finding was repared by Region VI of the Federal Emergency Management Agency (FEMA).

The review of the plans was based on Section II (A through P), Planning Standards and Evaluation Criteria, NUREG-0654/FEMA REP-1, Rev. 1. Based on this current review, our earlier interim finding submitted to the Nuclear Regulatory Commission on September 29, 1982, and the results of the exercise on December 14, 1983, offsite radiological emergency plans and preparedness for the Comanche Peak Steam Electric Station have been determined to be adequate. Consequently, there is reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public living in the vicinity of the Commanche Peak Steam Electric Station.

If you have any questions, please contact Robert S. Wilkerson, Chief, Technological Hazards Division, at 287-0202.

Attachment As Stated

## APPENDIX G

## EMERGENCY PREPAREDNESS EVALUATION REPORT

In Appendix G of Supplement No. 6 to the Safety Evaluation Report for Comanche Peak (NUREG-0797, Suppl. No. 6, November 1984), the staff noted that it had requested supplemental interim findings from the Federal Emergency Management Agency (FEMA) on the adequacy of the revised offsite emergency response plans. By memorandum, dated November 29, 1984, FEMA provided their supplemental interim findings based on the review of the original and revised offsite plans and the results of the December 14, 1983 full participation exercise. FEMA determined that:

"...offsite radiological emergency plans and preparedness for the Comanche Peak Steam Electric Station have been determined to be adequate. Consequently, there is reasonable assurance that appropriate measures can be taken offsite to protect the health and safety of the public living in the vicinity of the Comanche Peak Steam Electric Station."

The staff has reviewed the FEMA finding and determined that the findings support the staff's recommendation that there is an adequate state of onsite and offsite emergency planning and preparedness for full power licensing for the Comanche Peak Steam Electric Station.
