VIRGINIA ELECTRIC AND POWER COMPANY RICHMOND, VIRGINIA 23261

March 5, 1996

U. S. Nuclear Regulatory Commission Attention: Document Control Desk Washington, DC 20555 Serial No. 96-082 NL&OS/EJL Docket Nos. 50-338 50-339 72-16 License Nos. NPF-4 NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
PHYSICAL SECURITY PLAN - REVISION 39
SAFEGUARDS CONTINGENCY PLAN - REVISION 5

The Virginia Electric and Power Company hereby submits the enclosed changes to the North Anna Power Station Physical Security Plan and Safeguards Contingency Plan, in accordance with 10 CFR 50.54(p)(2). A description and justification for the changes are also enclosed. The plan revisions have been reviewed and approved by the Station Nuclear Safety and Operating Committee. We have determined that these changes do not reduce the effectiveness of the plans.

On May 25, 1995 we provided safeguards information (letter Serial No. 95-252) for the North Anna Power Station Independent Spent Fuel Storage Installation (ISFSI) to the NRC in accordance with 10 CFR 72.24(o) in support of our ISFSI license application. The descriptions of the ISFSI security plan and safeguards contingency plan that were enclosed with our May 25 letter are superseded by the enclosures to this letter. Additionally, on December 18, 1995 we submitted Revision 0 of the North Anna and Surry Consolidated Nuclear Socurity Personnel Training and Qualification Plan to the NRC (letter Serial No. 95-279). This consolidated plan includes training and qualification material for the North Anna ISFSI, and supersedes the training and qualification material that was provided in our May 25, 1995 letter. The safeguards documents of record for the North Anna ISFSI license application are

- The North Anna Power Station Physical Security Plan Revision 39
- The North Anna Power Station Safeguards Contingency Plan Revision 5
- The Nuclear Security Personnel Training and Qualification Plans for Surry and North Anna - Revision 0
