

MAY 23 1984

Carolina Power and Light Company
ATTN: Mr. E. E. Utley
Executive Vice President
Power Supply and Engineering
and Construction
411 Fayetteville Street
Raleigh, NC 27602

Gentlemen:

SUBJECT: REPORT NO. 50-261/84-10

On March 19 - 23, 1984, NRC inspected activities authorized by NRC Operating License No. DPR-23 for your H. B. Robinson facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed inspection report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The inspection findings indicate that certain activities violated NRC requirements. The violations, references to pertinent requirements, and elements to be included in your response are presented in the enclosed Notice of Violation.

Your attention is invited to unresolved items identified in the inspection report. These matters will be pursued during future inspections.

In accordance with 10 CFR 2.790(a), a copy of this letter, its enclosures, and your reply will be placed in NRC's Public Document Room upon completion of our evaluation of the reply. If you wish to withhold information contained therein, please notify this office by telephone and include a written application to withhold information in your response. Such application must be consistent with the requirements of 2.790(b)(1).

Paragraph 10 of the enclosed report concerns inaccurate statements made to the NRC in license applications for disposal of radioactive material. While the statements were not material or relevant to the NRC decision to approve these license applications, the NRC is concerned that the review of the application, prior to submittal, did not eliminate the inaccurate statements. You should discuss your intended actions to preclude inaccurate statements in future correspondence to the NRC. This concern should be addressed with your response to the Notice of Violation in Enclosure 1.

The responses directed by this letter and the enclosures are not subject to the clearance procedures of the Office of Management and Budget issued under the Paperwork Reduction Act of 1980, PL 96-511.
