

DEC 18 1984

MEMORANDUM FOR: Darrell G. Eisenhut, Director  
 Division of Licensing  
 Office of Nuclear Reactor Regulation

FROM: J. Nelson Grace, Director  
 Division of Quality Assurance, Safeguards,  
 and Inspection Programs  
 Office of Inspection and Enforcement

SUBJECT: LIMERICK UNIT 1 - INDEPENDENT DESIGN VERIFICATION PROGRAM

As you are aware, on January 1, 1984, the responsibility for the Independent Design Verification Program (IDVP) was transferred from NRR to IE. As part of the IE directed program Philadelphia Electric Company, the applicant for Limerick Unit 1, had an IDVP performed by Torrey Pines Technology (TPT). This IDVP was initiated by TPT in May 1984 and has included IE inspections for implementation of the program plan in July and for an assessment of the IDVP's findings upon a low power operating license in September. On December 14, 1984, IE received via express mail copies of the final IDVP Report. NRR will receive copies through normal distribution. IE is reviewing the final IDVP report and we will contact NRR if we have any specific questions associated with compliance to licensing commitments. It is anticipated that IE's review of the final report will be completed with SER input to the project manager by January 31, 1985.
