U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D. C. 20555

Subject: McGuire Nuclear Station, Unit 1
Docket Number 50-369
Core Operating Limits Report for Cycle 11

Please find attached, pursuant to McGuire Technical Specification 6.9.1.9, a revision to the Core Operating Limits Report for McGuire Unit 1 Cycle 11. This revision is being provided to update RWST minimum contained borated water volume (level) for LCO 3.1.2.5b and 3.1.2.6b. Level indicator scales were changed to reflect the zero reference point as the instrument tap which is located 20 inches from the bottom of the tank. These changes will improve RWST level indication from a human factors standpoint.

If there are any questions, please call Richard Clark at (704) 382-5823.

Very truly yours,

K. S. Canady, Manager
Nuclear Engineering
Nuclear Generation Department
