CORPORATION

Crystal River Unit 3

Docket No. 50-302

March 17, 1996  
3F0396-15

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, D.C. 20555

Subject: Technical Specification Change Request NO. 203, Revision 1

Reference: A. FPC to NRC letter, 3F0595-05 dated May 31, 1995  
B. NRC to FPC letter, 3N0494-21 dated April 26, 1994

Dear Sir:

Florida Power Corporation (FPC) hereby submits Revision 1 to Technical Specification Change Request No. (TSCRN) 203 requesting amendment to Operating License No. DPR-72. As part of this request, the TSCRN and the proposed replacement pages are provided.

The revised TSCRN adds a strategy for dispositioning small volume eddy current indications attributed to Inter-granular Attack (IGA) in the first span of Crystal River Unit Three (CR-3) Once Through Steam Generators' (OTSG) tubes. The TSCRN was previously provided in Reference A, to fulfill the Confirmatory Action Letter (Reference B), Item No. 9, to "Provide a proposed License Amendment based on your evaluation of the tube pull data no later than May 31, 1995."

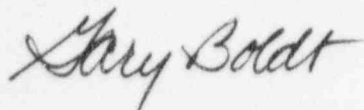

In order to provide additional assurance of tube leakage integrity, FPC commits to performing in-situ pressure testing of a representative sample of tube indications.

Acc'd  
11

U. S. Nuclear Regulatory Commission  
3F0396-15  
Page 2

This proposal is more conservative than the original technical specification change request submitted in Reference A. Thus, no change to the Significant Hazards Evaluation is proposed or considered necessary.

Sincerely,

A handwritten signature in cursive script that reads "Gary Boldt".

G. L. Boldt,  
Vice President  
Nuclear Production
