Dear Mr. Lyster:

This refers to the routine safety inspection conducted by Messrs. A. Vogel, J. Hopkins, and P. Hiland of this office on April 13 through June 1, 1992. The inspection included a review of activities authorized for your Perry Nuclear Power Plant, Unit 1, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress.

During the inspection, certain of your activities appeared to be in violation of NRC requirements. However, as described in the enclosed inspection report, you identified these violations. Therefore, the violations will not be subject to enforcement action because your efforts in identifying and correcting the violations meet the criteria specified in Section VII.B of the "General Statement of Policy and Procedures for NRC Enforcement Actions," (Enforcement Policy, 10 CFR Part 2, Appendix C (1992)).
