Wichita, Kansas 67201

Gentlemen:

This refers to the inspection conducted by Mr. W. J. Key of the NRC Region III office during the period September 10-14, and September 24-25, 1984, of activities authorized by NRC Construction Permit CPPR-147 for the Wolf Creek Generating Station, and to the discussion of our findings with W. J. Rudolph, and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included installed HVAC systems; a review of Bechtel design specification; Daniels installation and quality procedures; and Irsay duct fabrication instructions; review of welding and inspection personnel qualification and training records; and a review of selected installation, inspection documents, and allegation followup. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room unless you notify this office, by telephone, within 10 days of the date of this letter, and submit written application to withhold information contained therein within 30 days of the date of this letter.
