Hey John,

No problem – thanks for the update. I totally understand. The entire NRC is on mandatory telework too and having many challenges with that as well.

Thanks.
Bryan

Bryan – I did get your email and prepared a reply last week. I'm just waiting on a signature from our Vice President. Sorry for the delay but most of our staff is working from home. I'll try to get you a response tomorrow or early next week.

John

Mr. Stuedemann,

Did you receive my previous email from 3/18 (see below)? I just wanted to check. Please let me know if you are receiving and provide a status to my request for info if possible.

Thanks.

Bryan

Subject: NRC license amendment

Mr. Stuedemann,

I am the license reviewer working on the amendment to your NRC license to replace Mr. Popp with you as the Radiation Safety Officer (RSO).

Could you please provide another letter, signed by your management, giving more specific details as to your training and experience as it relates to radiation safety? I see you have been in the industry for a long time and appear to have experience working with and/or around radioactive material (RAM). But I need a bit more detail if possible to include the types and quantities of RAM you have worked with over the years. I don't need exact dates per se, but basic isotopes and type of work activities, would be most helpful.

You can respond by email by attaching the letter, again, signed by your management, as a PDF and sending to me.

If you have any questions, please let me know.

Thanks.

Bryan
