Docket No. 50-445

Mr. William J. Cahill, Jr.
Group Vice President, Nuclear
TU Electric Company
400 North Olive Street, L.B. 81
Dallas, Texas 75201

Dear Mr. Cahill:

SUBJECT: RESPONSE TO GENERIC LETTER 91-13, "REQUEST FOR INFORMATION RELATED TO THE RESOLUTION OF GENERIC ISSUE 130, 'ESSENTIAL SERVICE WATER SYSTEM FAILURES AT MULTI-UNIT SITES,' PURSUANT TO 10 CFR 50.54(f)" (TAC NO. M81173)

On September 16, 1991, the NRC issued Generic Letter (GL) 91-13 which contained the staff resolution of Generic Issue 130. The GL required that the applicable facility review the recommended Technical Specification (TS) and procedure improvements discussed in the generic letter and review the applicability and safety significance of those improvements for their facility. Each licensee or applicant was requested to state whether the proposed TS changes are applicable to their facility, and whether they will commit to the improvements.

By letter dated March 16, 1992, you responded to the GL. In that letter, you indicated that TS changes would be submitted. By letter dated June 5, 1992, you submitted your proposed changes to the TS, to be incorporated into the combined TS for Comanche Peak Steam Electric Station, Units 1 and 2, when issued. The staff has reviewed your March 16, 1992, response and finds that it meets the reporting requirements set forth in GL 91-13. This completes the staff's activities on TAC No. M81173. The staff is reviewing the TS changes submitted in your June 5, 1992, letter under a separate TAC.

Sincerely,
Original Signed By
Thomas A. Bergman, Project Manager
Project Directorate IV-2
Division of Reactor Projects III/IV/V
Office of Nuclear Reactor Regulation
