

UNITED STATES ATOMIC ENERGY COMMISSION

DOCKET NO. 50-160

GEORGIA INSTITUTE OF TECHNOLOGY

NOTICE OF ISSUANCE OF CONSTRUCTION PERMIT

No request for a hearing or petition for leave to intervene having been filed following publication of the notice of proposed action in the Federal Register on December 22, 1972 (37 F. R. 28312), the Atomic Energy Commission ("the Commission") has issued Construction Permit No. CPRR-116 to the Georgia Institute of Technology (Georgia Tech) as proposed in that notice, except that the earliest date for completion of the modifications to the reactor has been changed from February 22, 1973, to May 22, 1973. The construction permit authorizes Georgia Tech to make modifications to its existing research reactor located on its campus in Atlanta, Georgia, which are necessary for operation of the reactor at power levels up to 5 megawatts (thermal) in accordance with Georgia Tech's application received by the Commission's regulatory staff on March 11, 1968, as amended.

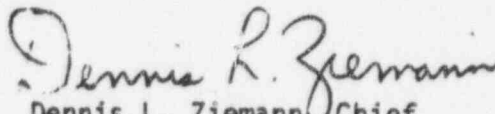

The Commission has found that the application for the construction permit complies with the requirements of the Atomic Energy Act of 1954, as amended ("the Act"), and the Commission's regulations published in 10 CFR Chapter I. The Commission has made the remainder of the findings required by the Act and the Commission's regulations, which are set forth in the construction permit, and has concluded that the issuance of the construction permit will not be inimical to the common defense and security or to the health and safety of the public. The Georgia Institute

of Technology has satisfied the indemnification requirements of Section 170 of the Act and 10 CFR Part 140 of the Commission's regulations.

A copy of the construction permit and the Safety Evaluation dated December 19, 1972, are available for inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C., or may be obtained upon request sent to the U. S. Atomic Energy Commission, Washington, D. C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 2nd day of May 1973.

FOR THE ATOMIC ENERGY COMMISSION

Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Directorate of Licensing

AEC letter dated June 6, 1974, that amends the Facility License authorizing a licensed power level increase to 5 megawatts (thermal)
