Date Signed

Approved by: D. R. McGuire
D. R. McGuire, Chief
Safeguards Section
Nuclear Materials Safety and Safeguards Branch
Division of Radiation Safety and Safeguards

7/1/92
Date Signed

SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security for Power Reactors; specifically Contingency Plans, Access Controls, Audits, and Power Supply. Two safeguards (reportable) events were reviewed. The licensee's corrective actions to two prior items were reviewed.

Results:

In the areas inspected, no violations or deviations were identified.

One non-cited violation (NCV) was identified regarding vital area doors being left in unsecured condition on two occasions.

Prior violations (92-04-01 and 02) were closed. An issue regarding the reliability of security equipment will remain open and will now include the licensee's testing of the security diesel under a full load.

The licensee's Security Program appears to remain adequate but is experiencing weaknesses in security shift supervisors' and officers' attention to access control procedural requirements.

This document contains information which is classified as "Secret" under Executive Order 12958. When separated from this document, the document is declassified.

SAFEGUARDS INFORMATION

2

Contingency planning appears well coordinated with offsite agencies, audits are thorough and reported to the correct level of management, and power supplies appear to be adequate but in need of testing under full load requirements.
