PERFORMANCE DATA ADDENDUM
January 1992 thru June 30, 1992

A) The Annual random testing rate:

At the current rate of testing the projected test rate for the entire year will be 115%

B) The following initiatives were taken:

None

C) Lessons learned:

Effective communications continues to be a vital part of the Program.

D) Effectiveness evaluation:

The zero positive test rate indicates that Program objectives are being met.

E) Other applicable data or observations:

None.

F) Data Analysis and appropriate actions to correct program weaknesses:

The zero positive test rate indicates that the Program is being effectively implemented and personnel are responsive to it.

G) List of 10CFR26.73 reports:

No reports meeting the criteria of 10CFR26.73 were submitted in this reporting period.

ADDITIONAL INFORMATION

The Fort St. Vrain Generating Station completed defueling to an away from reactor site Independent Spent Fuel Storage Installation on June 11, 1992. At that time the station terminated its 10CFR26 Fitness for Duty Program.
