Re: Docket No. 50-336-OLA
ASLBP No. 92-665-02-OLA

Ladies and Gentlemen:

I am responding to your letter of 22 June 1992 regarding the design change of the spent fuel pool at Unit 2 of Millstone Nuclear Power Station in Waterford Connecticut. I offer the following with regards to the arguments presented in the letter signed by John T. Hull, Counsel for NRC Staff and Edwin J. Reis, Deputy Assistant General Counsel for Reactor Licensing:

- 1.) My interests and the interests of my family would most certainly be affected by a nuclear spill resulting from the proceeding being considered in this licensing application by Northeast Nuclear Energy Company. As stated in my letter, a spent fuel accident resulting in the release of radioactivity to the air would contaminate surface drinking water reservoirs as well as soil and food. My profession as an architect would likewise be dramatically adversely affected through contamination of lands and buildings in this geographical area.
- 2.) With regard to the alleged untimeliness of my petition, the telephone number listed in the Federal Register was invalid though I was ultimately able to contact by telephone Mr. John Stolz of the Atomic Safety and Licensing Board. In addition to notifying Mr. Stolz of my concerns I stated to him that my confirming letter was forthcoming. My letter was indeed forwarded in a timely fashion.

I am grateful that my petition as well as the petitions of other members of The Cooperative Citizens Monitoring Network are still being considered.

Very truly yours,

Michael J. Pray, AIA
