Subject: Beaver Valley Power Station, Unit No. 1 and No. 2
BV-1 Docket No. 50-334, License No. DPR-66
BV-2 Docket No. 50-412, License No. NPF-73
BVPS Physical Security Plan (PSP)

Enclosed is Revision 29 to Issue 4 of the Beaver Valley Power Station (BVPS) Physical Security Plan (PSP) (Base Plan and Contingency Plan). These changes are being submitted utilizing the criteria described in NRC Generic Letter 95-08. Revision 29 changes include the following:

1. Revised the policy regarding land vehicle bomb attack threats in order to implement the recent changes to 10 CFR 73.55(c), including the requirement to implement a permanent vehicle barrier system.
2. Revised the policy on required actions for short-term (two weeks or less) misplacement of security badges in light of the Biometric access system now in use. The new policy now provides for badge inactivation or computer programming of misplaced badges to a nonfunctional (OFFSITE) status.
3. Revised and enhanced the diagram of the security system power arrangement to show additional detail.
4. Made minor changes to the drawing of the Security Building (Figure 6-1) to identify that the gray matte area denotes that portion of the building as a Vital Area.
5. Revised a drawing (Figure 6-2) depicting the revised location of the Closed Circuit Television (CCTV) for the Security Controlled Zone at the Primary Access Facility.

These changes have been reviewed and judged not to decrease the safeguards effectiveness of the BVPS Physical Security Plan. Accordingly, this revision is being submitted in accordance with 10 CFR 50.54(p)(2).
