Mr. Robert D. Martin, Regional Administrator
U. S. Nuclear Regulatory Commission
Region IV, Office of Inspection and Enforcement
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Dear Mr. Martin:

River Bend Station Unit 1
Refer to: RIV
Docket No. 50-458/I&E Bulletin 83-08

In a letter dated September 28, 1984, Gulf States Utilities (GSU) responded to Bulletin 83-08 "Electrical Circuit Breakers with an Undervoltage Trip Feature in Use in Safety-Related Applications other than the Reactor Trip Systems."

GSU is currently working with its NSSS supplier (General Electric Company) to identify circuit breakers with the undervoltage trip feature. GSU anticipates that the investigation will be completed by February 4, 1985. At that time GSU will provide a final response or a status report.

An estimate of utility and staff time expected in responding to this bulletin will be provided in the final response. Should you have any questions concerning this response, please contact us.

Sincerely,

J. E. Booker
