Gentlemen:

SUBJECT: Supplement to Application for Amendment of Operating License dated November 11, 1991

Enclosed please find a supplement to Omaha Public Power District's (OPPD) "Application for Amendment of Operating License" which seeks to amend the Fort Calhoun Station Unit No. 1 Technical Specifications. The changes requested are to revise the reporting requirements, upon loss of 161kV, from calling the NRC Region IV to calling the NRC Operations Center and to clarify what type of written report will be submitted. This submittal supercedes the application submitted in Reference 3 on a replacement page basis.

Attachment A contains a markup reflecting the requested changes of the Technical Specification. Attachment B provides a Discussion, Justification and No Significant Hazards Consideration Analysis, for the changes requested. OPPD respectfully requests 60 days from the date of issuance to implement these changes.

If you have any additional questions, or require further information, please do not hesitate to contact me or members of my staff.

Sincerely,

W. G. Gates
Division Manager
Nuclear Operations
