Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-302/92-13

This refers to the inspection conducted by E. D. Testa of this office on June 1-5, 1992. The inspection included a review of activities authorized for your Crystal River facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in this report.

Areas examined during the inspection are detailed in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified; however, a negative trend was observed in the aggressiveness of health physics technicians in identification and correction of health physics' housekeeping problems. The report also identifies a problem in the sufficient availability of appropriate radiation monitoring equipment (Paragraphs 3, 4, 7).

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
