Mr. J. J. Carey, Vice President
Nuclear Group
Duquesne Light Company
Post Office Box 4
Shippingport, PA 15077

Dear Mr. Carey:

SUBJECT: BEAVER VALLEY UNIT 1 - SAFETY EVALUATION, CONTROL OF HEAVY LOADS
(LICENSING ACTION TAC 07972)

Following the issuance of NUREG-0612, "Control of Heavy Loads At Nuclear Power Plants", a generic letter dated December 22, 1980, was sent to all licensees and applicants requesting that responses be prepared to indicate the degree of compliance with the guidelines of NUREG-0612. In accordance with the generic letter, Duquesne Light Company was requested to review provisions for handling and control of heavy loads at the Beaver Valley Unit 1 facility to determine the extent to which the guidelines of NUREG-0612 are satisfied, and to commit to mutually agreeable changes and modifications that would be needed in order to fully satisfy these guidelines. By letters June 23, 1981, April 26, 1982 and October 9, 1984 you provided the responses to this request.

The staff and its consultant, Franklin Research Center (FRC), have reviewed your submittals. As a result of its review, FRC has issued a Technical Evaluation Report (TER). The staff concurs with FRC's conclusion that the guidelines in NUREG-0612, Sections 5.1.1 have been satisfied by Duquesne Light Company for Beaver Valley Unit 1. The TER is enclosed with this letter. This completes Phase I of the subject review. An evaluation of Phase II will be the subject of future correspondence.

Sincerely,

/s/SVarga

Steven A. Varga, Chief
Operating Reactors Branch #1
