Louisiana Power & Light Company
ATTN: R. S. Leddick, Sr. Vice President
Nuclear Operations
142 DeLaronde Street
New Orleans, Louisiana 70174

Gentlemen:

This refers to the inspection conducted by Mr. G. L. Constable, other members of this office, and NRC consultants during the period November 5-16, 1984, of activities authorized by NRC Construction Permit CPPR-103 for Waterford 3 SES, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included: review of actions taken on previously identified findings in your operational quality assurance and quality control programs, and the Inquiry Team and the Construction Apraisal Team inspections; closeout actions regarding significant construction deficiencies; and assessment of allegations. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
J. E. Gagliardo
