Dear Chuck,

On June 5, 1992 Commonwealth Edison submitted a request to amend NPF-11 to allow the rerack of the LaSalle Unit 1 Fuel Pool. Figure 4.6.1, Reactivities in the Storage Rack with 4.4% and 4.6% Enriched Fuel, was inadvertently omitted from the submittal. Attached is a copy of Figure 4.6.1. We apologize for any inconvenience this omission may have caused the Technical Staff.

Sincerely,

JoAnn Shields  
 Nuclear Licensing Administrator
