

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555  
January 10, 1985

Docket Nos: 50-424  
and 50-425

Mr. Donald O. Foster  
Vice President and General Manager  
Georgia Power Company  
Route 2, Box 299A  
Waynesboro, GA 30830

Dear Mr. Foster:

SUBJECT: Vogtle, Units 1 and 2 AFW System Reliability Analysis

The enclosed draft Technical Evaluation Report (TER) entitled "Review of the Vogtle Units 1 and 2 Auxiliary Feedwater System Reliability Analysis" has been prepared by Brookhaven National Laboratory (BNL) for the subject analysis. The draft TER is based on the Vogtle FSAR, Chapter 10. You should pay particular attention to Section 9.2.3 of the TER which discusses where the required information was not available. This information is needed as soon as possible so that the assumptions may be clarified and our final SER input can be prepared for Section 10.4.9, "Auxiliary Feedwater System." We would like to set up a conference call with your staff to discuss the TER once they are familiar with the indicated concerns.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

If there are any questions, contact the project manager, Melanie Miller at (301) 492-4259.

Sincerely,

A handwritten signature in cursive script that reads "Elinor G. Adensam".

Elinor G. Adensam, Chief  
Licensing Branch No. 4  
Division of Licensing

Enclosure:  
As stated
