DUKE POWER

April 3, 1996

U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Document Control Desk

Subject: Catawba Nuclear Station
Docket Numbers 50-413 and -414
Technical Specification Revision to Implement Revised 10
CFR 50 Appendix J; Supplement

By letter dated January 12, 1996, Duke Power requested a change to Technical Specification 4.6.1.2, to incorporate new regulations relative to containment leakrate testing. Included in that request was the deletion of a footnote relative to an exemption to defer an upcoming Unit 1 test. This proposed change should have also requested the deletion of a similar footnote applicable to Unit 2. Therefore, the sentences at the bottom of page 1, Attachment II, of the January 12, 1996 letter should have read, "A footnote at the bottom of page 3/4 6-3, which refers to the deferral of CLRTs for Catawba Units 1 and 2, is deleted. With the approval of this proposed amendment, these tests will become unnecessary."

If any additional information is required, please call Scott Gewehr at (704) 382-7581.
