## SUMMARY

### Scope:

This routine, unannounced inspection was conducted in the area of the Physical Security Program for Reactors. Specific areas evaluated were Management Support; Security Program Plans; Protected Area Barriers; Detection and Assessment Aids; Protected Area Access Control - Packages and Personnel; Alarm Stations and Communications; and Security Training and Qualification.

### Results:

In the areas inspected, violations or deviations were not identified. The licensee continues to provide appropriate security for vital resources. The Training and Qualification Program remains one of the strongest features of the licensee's security program. The professionalism of the security force and security management was noted during inspection.
