DOCKETING & SERVICE  
BRANCH

Docket Number 50-346

License Number NPF-3

Serial Number 2063

July 8, 1992

Mr. Samuel J. Chilk  
Secretary of the Commission  
Nuclear Regulatory Commission  
Washington, DC 20555

Attention: Docketing and Service Branch

Subject: Comments On Proposed Rule: Receipt of Byproduct and Special Nuclear Material

Dear Mr. Chilk:

Toledo Edison, a subsidiary of Centerior Energy, is partial owner of and is responsible for operation of the Davis-Besse Nuclear Power Station. Toledo Edison has been authorized for power operation of the Davis-Besse Nuclear Power Station since April 1977. As a 10 CFR 50 licensee, Toledo Edison has a vested interest in any policies the NRC may adopt which can affect the management and operation of a commercial nuclear power plant.

Toledo Edison concurs with the Proposed Rule, published in the Federal Register on April 24, 1992 (57 FR 15034), which would allow a reactor licensee to receive back byproduct and special nuclear material that is produced by operating the reactor after that waste has been sent offsite to be reduced in volume by compaction or incineration.

If you have any questions regarding these comments, please contact Mr. Robert W. Schrauder, Manager - Nuclear Licensing at (419) 321-2366.

Sincerely yours,

MAT/dlc
