U. S. Nuclear Regulatory Commission  
Document Control Desk  
Washington, DC 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION (CPSES)  
DOCKET NOS. 50-445 AND 50-446  
TRANSMITTAL OF THE CPSES PHYSICAL SECURITY  
PLAN REVISION 26

REF: TU Electric letter logged TXX-95049, from  
C. L. Terry to NRC dated February 24, 1995

Gentlemen:

In accordance with 10CFR50.4, enclosed are four (4) copies of the CPSES Physical Security Plan Revision 26 (copy numbers: 13, 14, 15 and 16). Included with each plan is a "Summary of Changes" which lists the changes incorporated in Revision 26.

An evaluation conducted per 10CFR50.54(p), determined that these changes do not decrease the effectiveness of the security program. The enclosure to this letter contains SAFEGUARDS INFORMATION as defined in 10CFR73.21; consequently, the enclosure should not be placed in the Public Document Room.

Page 2 of 2

Please note that Revision 26 adds a general description of the vehicle barrier system (VBS) installed at CPSES. Also, please be advised that the final as built VBS design is not totally equivalent to that previously described in the summary description of proposed control measures submitted to the NRC with the above referenced letter; however, the as built VBS design is in conformance with the guidelines and methodology provided by the NRC for this purpose. The details of the final as built VBS design are maintained onsite in controlled documents and are available for NRC inspection.

Sincerely,

C. L. Terry
