Wichita, Kansas 67201

Gentlemen:

This refers to the special team inspection of the post-proof and review copy of the Wolf Creek Technical Specifications, dated August 28, 1984, conducted for this office by inspectors from Regions II, IV, and V during the period of September 30 through October 5, 1984. Enclosure 1 documents the comments of the onsite effort, and Enclosure 2 documents the comments of the in-office review performed by Region II.

The Wolf Creek Technical Specifications were reviewed and compared against the Wolf Creek and SNUPPS Final Safety Analysis Reports, Wolf Creek and referenced Callaway Safety Evaluation Reports, Westinghouse Standard Technical Specifications, NRC Generic Letters, Wolf Creek System Descriptions and Design Drawings, and the actual as-built configurations of the plant.

Within the scope of this inspection, no violations or deviations were identified.

All of the comments addressed in this inspection report were sent directly to NRR for their evaluation and action, as appropriate. The NRR evaluation and response were addressed in memo from Messrs. Crutchfield and Novack to Mr. Eisenhut, dated November 14, 1984, and the appropriate changes were incorporated into the final draft Wolf Creek Technical Specifications. No further action or response is required to the comments included in this report.
