Dallas, Texas 75201

Gentlemen:

This refers to the inspection conducted by Mr. J. L. Montgomery of this office and four contract inspectors during the period November 13-15, 1984, of activities authorized by NRC Construction Permit CPPR-126 for the Comanche Peak Steam Electric Station Unit 1, and to the discussion of our findings with Mr. B. R. Clements and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included the performance of the licensee's emergency preparedness staff during the annual emergency response exercise. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

D. R. Hunter, Chief  
Reactor Project Branch 2
