NOTE TO: File

FROM: Michele L. Burgess *MB*

DATE: 03/21/96

In response to a call from Kent Prendergast of R-IV, we reviewed the information concerning a Nordion Model 365 (or F-365) source changer. From the information in the Nordion Model C-990 source assembly registration certificate (NR-0220-S-110-S dated 02/13/95) and background file, it was determined that Nordion purchases SPEC C-1 source changers and redistributes them as a Model 365 source changer to fit their C-990 source assembly. The C-990 registration certificate approves the 365 and the C-1 for use with the C-990. Based on this, we have updated RADXREF to include the NORDION Model 365 changer/NORDION Model C-990 source and the SPEC C-1 changer/NORDION Model C-990 source as approved pairs. There was no certificate issued for the NORDION 365 changer. Based on the fact that the SPEC C-1 and the NORDION 365 are identical, the NORDION 365 has been listed in RADXREF as Part 34 compatible.

I reviewed this with Tom Rich and he is in agreement.
