and response and analysis of the plant for transients and accidents. An initial training and retraining program for the Technical Advisors shall be maintained under the direction of the Training Supervisor. The Technical Advisors shall also receive training in plant design and layout, including the capabilities of instrumentation and controls in the Control Room.

Specification AC 7.1.2 - Plant Operations Review Committee (PORC,  
Administrative Controls

The organization, responsibilities, and authority of the PORC shall be as follows:

1. Membership

The Plant Operations Review Committee shall be composed of the following:

Chairman: Station Manager

Technical/Administrative Services Manager

| Support Services Manager

Superintendent of Operations

Superintendent of Maintenance

Superintendent of Nuclear Betterment Engineering

Health Physics Supervisor

- AC 7.1.3
- e) Instrumentation and Control
  - f) Radiological Safety
  - g) Mechanical and Electrical Engineering
  - h) Quality Assurance Practices
  - i) (Other appropriate fields associated with the unique characteristics of the nuclear power plant.)

2. Membership

The NFSC shall be composed of the following:

- Chairman: Vice President, Electric Production
- | Executive Staff Assistant, Electric Production
- Manager, Nuclear Production Division
- Manager, Nuclear Engineering Division
- | Manager, Quality Assurance Division
- Manager, Risk Management

Consultants, as required and appointed by the Chairman

3. Alternates

An alternate chairman and alternate members, if required, shall be appointed in writing by the

Attachment 3

Significant Hazards

Considerations

Significant Hazards Considerations

Since the proposed changes to Section 7.1 of the Fort St. Vrain Technical Specifications are administrative in nature, no significant safety hazards considerations are involved.

Based on the above, operation of Fort St. Vrain in accordance with the proposed changes will not 1) involve a significant increase in the probability or consequences of an accident previously evaluated, 2) create the possibility of a new or different kind of accident from any accident previously evaluated, or 3) involve a significant reduction in a margin of safety.
