SUBJECT: NRC INSPECTION REPORTS NO. 50-454/92006(DRP); 50-455/92006(DRP)

Dear Mr. Reed:

This will acknowledge receipt of your letter dated May 29, 1992, in response to our letter dated March 30, 1992, transmitting Inspection Reports No. 50-454/92006(DRP) and No. 50-455/92006(DRP). These reports addressed two unresolved items: the first concerning work performed not addressed by station documents; and the second concerning methods used to verify operability testing of check valves in systems open to the containment atmosphere where the process medium is air. We have reviewed your responses and have no further questions at this time. The corrective actions will be examined during future inspections.

Sincerely,

Brent Clayton
