Re: In the Matter of Public Service  
Electric and Gas Company, et al.  
(Hope Creek Generating Station)  
Docket No. 50-354-OL

Dear Mr. Fryling:

This is to confirm our telephone conversation of this date regarding your letter of January 23, 1985, and the enclosed responses to interrogatories to which Applicants had objected.

As I indicated, we did not receive the "QA Trend Summary" referenced in your responses to Interrogatories III. 19, III. 20 and III. 21 of Intervenor's Third Set of Interrogatories. Additionally, the "PSE&G Action Plan Manhour graph" attached to your response to Interrogatory III. 68 of Intervenor's Third Set of Interrogatories had been photocopied in such a way to make it illegible.

You stated that the "QA Trend Summary" had not been provided but would be available for inspection at PSE&G in Newark. You also stated that you would attempt to provide a clearer copy of the "PSE&G Action Plan Manhour graph."

Thank you for your help in this regard.

Sincerely yours,

JOHN P. THURBER  
Assistant Deputy Public Advocate
