

ENCLOSURE 1

NOTICE OF VIOLATION

South Carolina Electric and Gas Company
Summer

Docket No. 50-395
License No. NPF-12

The following violation was identified during an inspection conducted on October 29 - November 2, 1984. The Severity Level was assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

10 CFR 50, Appendix B, Criterion V, as implemented by Section 17.2.5 of the FSAR, requires the licensee to prescribe activities affecting quality in documents appropriate to the circumstances, such as instructions and procedures. It further requires that these documents include appropriate acceptance criteria for determining that the activities have been satisfactorily accomplished.

10 CFR 50.55a requires the licensee to perform inservice testing on valves in accordance with ASME Section XI (77S78). ASME Section XI, Subsection IWV-3300, requires the licensee (as a test) to directly observe valves with remote position indicators at least as frequently as scheduled refueling outages, with at least one observation every 2 years, to verify that remote valve indications accurately reflect valve operation.

Contrary to the above, the licensee did not have documents containing acceptance criteria to assure that their valves with remote position indicators would be checked in accordance with the ASME Section requirements at the specified frequency.

This is a Severity Level V Violation (Supplement I).

Pursuant to 10 CFR 2.201, you are required to submit to this office within 30 days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violation; (2) the reasons for the violation if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved.

Security or safeguards information should be submitted as an enclosure to facilitate withholding it from public disclosure as required by 10 CFR 2.790(d) or 10 CFR 73.21.
